

# VIT VIT C+E

## Ultra whitening mask

### PEELING

#### Description / Use:

Chemical facial exfoliator with high gluconolactone content (20%), pure stable vitamin C + vitamin E and alpha hydroxy acids, which remove dead skins cells from the outermost layer of the epidermis, resulting in progressive whitening of: the skin, scarring and dark spots. In addition, it combats wrinkles and fine expression lines. **Appearance:** A slightly orange gel with a pleasant mandarin scent.

#### Main active ingredients:

Gluconolactone, pure stable Vitamin C (3-O-Ethyl Ascorbic Acid), Tocopherol, Mixture of alfa hydroxy acids, Salicylic Acid.

#### Secondary active ingredients:

Sodium PCA, tocopherol.

#### Ingredients:

Aqua (Water), Gluconolactone, Alcohol denat., Glycerin, Potassium Hydroxide, Sodium Citrate, Salicylic Acid, Acrylamide/Sodium Acryloyldimethyltaurate Copolymer, Sodium PCA, Hydroxyethylcellulose, Isohexadecane, Polysorbate-80, Sorbitan Oleate, 3-O-Ethyl Ascorbic Acid, Tocopherol, Glycolic Acid, Lactic Acid, Malic Acid, Tartaric Acid, Citric Acid, Cyamopsis Tetragonoloba (Guar) Gum, Xanthan Gum, Tetrasodium EDTA, Sodium Hydroxide, Sodium Gluconate, Hydrogenated Vegetable Oil, Limonene, Phenoxyethanol, Parfum (Fragrance), CI 16265 (Red 7), CI 47005 (Yellow 10).

#### Dermatological testing:

VIT VIT C + E Ultra whitening mask has undergone dermatological testing to check its tolerance. The study was carried out on 30 people between 22 and 63 years old. None of the participants showed any allergic reactions, thereby showing the product to be safe. \*

\*This statement cannot be applied to people who may be allergic to one of the ingredients in the formulation.

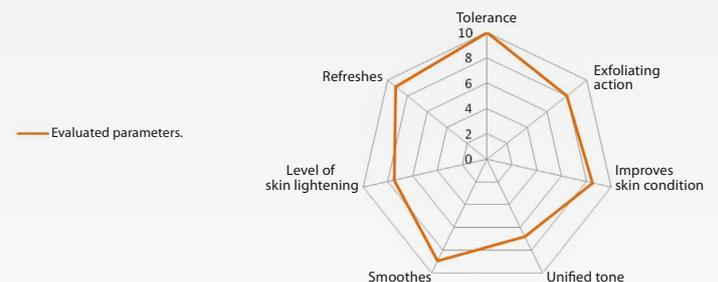

#### Measuring the level of skin depigmentation

A quantitative evaluation of the skin's pigmentation was carried out through a comparison before/after application of the peeling over a 4 week period using the Miravex Antera 3D camera.

After applying VIT VIT C + E Ultra whitening mask for 4 weeks, daily use of the cream was shown to lighten skin by **8%**, improving the tone of the face and neck. VIT VIT C + E Ultra whitening mask slows the signs of cutaneous and photo aging.

Evaluation of the product's action on 29 women with various skin types, 1 daily application for the first week, 2 or 3 applications a week for the following 3 weeks. Average values.

Reduced colouration after 4 weeks use. Instrumental measurements taken in the study of 29 women. Maximum values.
